College of Agricultural and Environmental Sciences

www.caes.ucdavis.edu
Picture yourself HERE

Imagine yourself as one of our students, active in campus organizations, participating in community service, enjoying first-class performing arts, and traveling across campus on a bicycle.

Whatever your dreams, the College of Agricultural and Environmental Sciences at UC Davis is a great place to start making them happen. The college offers 27 undergraduate majors and a complete range of graduate programs. Our college has a history of focused attention on undergraduate education and offers opportunities for a broad general education combined with specialization in a scholarly discipline.

In the College of Agricultural and Environmental Sciences you can participate in research with leading scholars, gain experience through internships around the world, or join an intramural sports team.

Come see for yourself.

www.caes.ucdavis.edu

UC Davis
College of Agricultural and Environmental Sciences
It’s the place to go.

The College of Agricultural and Environmental Sciences at UC Davis is the most innovative, integrated, and diverse school in the world for the study of agricultural, environmental, and human sciences.

Within our Tier One research environment, you will be challenged to join in research led by faculty who are among the best in the world. They will work with you so that you can learn to be the best in your major and your career.

Our students operate many college facilities, grow plants, raise animals, make wine, measure air pollutants, and explore how young children learn. They also gain experience through on-campus jobs, directed study, undergraduate research, study abroad programs, the UC Washington Program, and our UC Davis Internship and Career Center that helps over 6,000 students obtain internships each year.

This is hands-on learning at its best.
As a member of the College of Agricultural and Environmental Sciences community, you begin a relationship that will last a lifetime. You’ll explore the richness of numerous student clubs, Division I sports, residence hall theme programs, and peer advising opportunities. Faculty, administrators, advisers, alumni, and – perhaps most importantly – your peers, will help you through college. They will provide you with a network extending far beyond your academic experience.

“Nutrition is the perfect blend of science, health, and food; three of my favorite things. Before I came to college, I knew nutrition was the major for me. By choosing UC Davis, I had the opportunity to get involved in research and internships, and the chance to learn from some of the most knowledgeable professors in the country.”

Phoebe, junior, Clinical Nutrition

CAREER PREPARATION

“I have hired over 100 students, 90 percent of whom have been UC Davis graduates and postgraduates (Environmental Policy Analysis and Planning, Hydrology, and Wildlife, Fish and Conservation Biology). The various UC Davis programs and curricula are first-rate. I have come to know several of the faculty over the years and know the kind of rigor they apply to their courses and programs.”

Robert Shibatani, CEO
The Shibatani Group, Inc.
Select from 27 majors in the agricultural, environmental, and human sciences, many of which are the best in the world or uniquely offered here.

Our students and graduates shape agriculture, business, the environment, views on teaching and learning, nutrition, and public policy. Our alumni contribute to products and services that improve the lives of millions of people in California and around the globe.

Growing up in Davis, I thought I knew everything I would experience at the university. It looked totally different from the outside. I was pleasantly surprised once I started at UC Davis because now I get the best of both worlds.

Dwight, junior, Community and Regional Development
AGRICULTURAL AND ENVIRONMENTAL EDUCATION
Gain a foundation in agricultural and environmental sciences, as well as educational theory and practice. Prepare for careers in teaching, communications and outreach.

CAREERS: High school agricultural and environmental teacher, domestic and international agribusiness, outdoor education and nature programming, agricultural and environmental nonprofit organization
1202 Meyer Hall
(530) 754-7915
asac@ucdavis.edu
http://asac.ucdavis.edu

ANIMAL SCIENCE AND MANAGEMENT
Learn from animal science and agribusiness courses such as marketing, economics, and accounting. Build skills to succeed in business and careers working with animals and related industries.

CAREERS: Banking, financial services, animal health, feed manufacturing, biotechnology, and production agriculture, preparation for advanced graduate degrees and admission to professional schools such as veterinary medicine that lead to careers in teaching, research, extension, business management, veterinary medicine, state and federal agencies, private and public corporations
1202 Meyer Hall
(530) 754-7915
asac@ucdavis.edu
http://asac.ucdavis.edu

ANIMAL BIOLOGY
Put your theoretical knowledge of biology into practice by working with wild and domesticated animals in hands-on situations.

CAREERS: Research, teaching, health professions, veterinary medicine, pest management, agriculture, conservation, environmental management, industry
152 Hutchison Hall
(530) 754-7277
http://animalbiologymajor.ucdavis.edu

ATMOSPHERIC SCIENCE
Study how the atmosphere influences weather, air quality, and pollution, and build skills for a career that will keep the planet habitable.

CAREERS: Federal and state government, private sector, education, air-pollution forecasting and control, hurricane forecasting, weather satellite meteorology, numerical weather forecasting, and environmental impact assessments
1150 Plant and Environmental Sciences (PES) Building
(530) 752-1603
http://lawr.ucdavis.edu
GET INVOLVED
We have many ways students can be active within the college.

Special programs
• Aggie Ambassadors
• Career Discovery Groups
• Contemporary Leadership Minor
• Minorities in Agriculture, Natural Resources and Related Sciences (MANRRS)
• Science and Society Program
• Undeclared/Exploratory Program

Living laboratories
• Arboretum
• Bohart Museum of Entomology
• Center for Child and Family Development
• Horse Barn
• Student Farm
• Over 140 more to choose from!

BIOTECHNOLOGY
Learn how genes affect life processes while preparing for a career enhancing human health, food security and environmental quality; food quality, crop and herd improvement.

CAREERS: Agriculture, food and beverage industries, health care, chemical, pharmaceutical and biochemical industries, environmental and bioremediation industries, and graduate school

1220A Plant and Environmental Sciences (PES) Building
(530) 752-1715
www.plantsciences.ucdavis.edu

CLINICAL NUTRITION
Learn the principles of nutrition and education in preparation for careers that guide people to eat healthier diets, e.g., as a registered dietitian or nutrition specialist.

CAREERS: Employment in administrative, therapeutic, teaching, research or public health/public service positions in clinics, hospitals, schools, or other institutions

3202 Meyer Hall
(530) 752-2512
http://nutrition.ucdavis.edu
COMMUNITY AND REGIONAL DEVELOPMENT
Understand how economic, political, and sociocultural forces are transforming U.S. communities, while building skills to improve the quality of community life.

CAREERS: Careers that involve improving people’s social and physical environments, business, community development, social research, program evaluation, organizational and educational consulting, city and regional planning, community health

1303 Hart Hall
(530) 752-2244
http://hcd.ucdavis.edu

ECOLOGICAL MANAGEMENT AND RESTORATION
Plan for the future by learning to design sustainable agricultural systems that meet the world’s food needs.

CAREERS: Various technical and management positions in agricultural and business enterprises, farming, consulting, private, state and federal organizations, agencies concerned with rangeland and natural resource management, Cooperative Extension, international development, teaching, journalism

1220A Plant and Environmental Sciences (PES) Building
(530) 752-1715
www.plantsciences.ucdavis.edu

ENTOMOLOGY
Learn about insect science, diversity, and insect use as research models while building the skills to develop sustainable pest-control methods.

CAREERS: Technical, research, and consulting positions in agriculture, environmental sciences and the food industry, preparation for graduate school in biological research, including medical and veterinary entomology, ecology, evolution, and pest control

394A Briggs Hall
(530) 754-8341
http://entomology.ucdavis.edu

ENVIRONMENTAL HORTICULTURE AND URBAN FORESTRY
Learn how plants beautify, control erosion, and restore damaged lands while gaining hands-on skills in plant production and preparing for a rewarding career.

CAREERS: Managerial and technical positions in floriculture, production or landscape horticulture, arboriculture, seed production, plant breeding, urban forestry, turf management, restoration horticulture, environmental consulting, botanic gardens and arboreta, positions in federal/state/local agencies

1224 Plant and Environmental Sciences (PES) Building
(530) 752-7738
www.plantsciences.ucdavis.edu

ENVIRONMENTAL POLICY ANALYSIS AND PLANNING
Combine the natural sciences with more advanced work in reasoning and analysis through classes such as economics, political science, statistics, law, and ethical reasoning.

CAREERS: Governmental agencies, consulting firms and businesses concerned with environmental affairs, planning consultants (urban or environmental), energy, water quality or recycling analysts, preparation for graduate work in law, planning, public policy, resource economics or public/business administration

2134 Wickson Hall
(530) 752-7183
www.des.ucdavis.edu
ENVIRONMENTAL SCIENCE AND MANAGEMENT
You will study the interaction of physical, biological and social components of environmental problems. Learn the legal, economic, political issues and the scientific basis for environmental decision-making.

CAREERS: Practicing environmental scientists, resource analysts and planners, preparation for environmental law, policy and graduate level programs in environmental sciences, working in the public or private sector specializing in environmental quality, natural resources or ecological research
2134 Wickson Hall
(530) 752-7183
www.des.ucdavis.edu

ENVIRONMENTAL TOXICOLOGY
You will learn about environmental toxins, how sensitive we are to them, and how we can regulate their use, leading to a career as a toxicologist.

CAREERS: Environmental health and safety, monitoring and field sampling, residue or forensic analysis, pest control, testing of pharmaceutical or food additives, risk assessment, managing regulatory compliance
4111 Meyer Hall
(530) 752-1042
www.envtox.ucdavis.edu

FIBER AND POLYMER SCIENCE
You will learn material science and human and environmental issues related to the use and development of innovative and sustainable products for comfort, performance and protection.

CAREERS: Research, product development, technical marketing, production, quality evaluation, health professions, teaching science (on completion of a teaching credential)
129B Everson Hall
(530) 752-4417
http://textiles.ucdavis.edu

FOOD SCIENCE
Explore how to grow, process, pack, store, and distribute food while building skills to create tastier, more nutritious foods that meet market demands and consumer needs.

CAREERS: Supervisory, technical, applied research, sales, and executive positions in processing, quality assurance, process development, product development, sensory evaluation in food, beverage and related industries; state and federal government positions in research, food sanitation, regulation of foods and food safety; entry into postgraduate education in physical, biological and medical sciences
1206 Robert Mondavi Institute
– South Building
(530) 754-8368
http://foodscience.ucdavis.edu

HUMAN DEVELOPMENT
You will learn the socio-emotional and cognitive aspects of human development while preparing for a career in education, health care, or social services.

CAREERS: Working in preschools or elementary schools, special education, governmental jobs, childcare, social policy, social welfare, recreation, law, advanced programs in child guidance, counseling, health careers such as medical doctors, physical therapists, nurses, dentists
1303 Hart Hall
(530) 752-2244
http://hcd.ucdavis.edu

HYDROLOGY
You can focus on the occurrence, distribution, and behavior of water, and build skills to meet the challenges of sustaining water quantity and quality on Earth.

CAREERS: Private consulting firms, environmental interest groups, and government agencies dealing with water resources, jobs in public agencies at the federal, state or local level, and preparation for graduate school
1150 Plant and Environmental Sciences (PES) Building
(530) 752-1603
http://lawr.ucdavis.edu
INTERNATIONAL AGRICULTURAL DEVELOPMENT
Study how culture, economics, and technology affect agriculture while building skills to produce and distribute food to the people of developing countries.
CAREERS: Food production, nutrition, marketing, employment in international trade, governmental, health or private agency in a foreign nation, Peace Corps, mission or other types of humanitarian service abroad
1331 Hart Hall
(530) 752-2244
http://hcd.ucdavis.edu

LANDSCAPE ARCHITECTURE
Learn to design open spaces, parks, and neighborhoods, and gain skills for creative problem-solving while visualizing 3-D spaces. Fully accredited.
CAREERS: Private consulting firms including landscape architecture, architecture, urban design and planning offices, public agencies (e.g., city planning departments, National Park Service, U.S. Army Corps of Engineers, Bureau of Land Management), preparation for graduate school
135 Hunt Hall
(530) 754-8628
http://lda.ucdavis.edu

“My major offered a diverse range of applied business courses and equipped me with skills to succeed as a new grad in the business world. The education I received at UC Davis has been life changing and invaluable!”
Natalie Wang, ’09, Managerial Economics; Management Consulting Analyst, Accenture

MANAGERIAL ECONOMICS
Learn economic theory blended with practical business applications and prepare for careers in the business world or a great transition into MBA programs.
CAREERS: Supervisory and management training positions in financial services, retailing, manufacturing, and management services, private farm/ranch production, food and agriculture processing, sales, service
1176 Social Sciences and Humanities
(530) 754-9536
www.agecon.ucdavis.edu
NUTRITION SCIENCE
Understand how food components are used to promote health or disease while preparing for careers ranging from medicine to food-related research.

CAREERS: Food industry quality control, technical research assistant in labs, nutrition education, government nutrition, public health programs
3202 Meyer Hall
(530) 752-2512
http://nutrition.ucdavis.edu

TEXTILES AND CLOTHING
You will learn textile characteristics, consumer needs, and marketing techniques and prepare for a career in the fast-paced global fashion industry.

CAREERS: Product development, merchandising, marketing, production, sourcing, evaluation, quality control, technical service, conservation, design, journalism
129B Everson Hall
(530) 752-4417
http://textiles.ucdavis.edu

PLANT SCIENCES
The science, economics, and creative problem-solving in plant sciences will build the skills to meet the new challenges of farming and feeding people.

CAREERS: Technical and management positions in agricultural and business enterprises, farming, consulting; public/private/nonprofit agencies, Cooperative Extension, international development, teaching, agricultural or environmental journalism and communication services; qualifications to pursue graduate studies in natural and agricultural sciences such as plant biology, genetics, breeding, horticulture, agronomy, biotechnology, ecology, environmental studies, pest management, education, or business management
1220A Plant and Environmental Sciences (PES) Building
(530) 752-1715
www.plantsciences.ucdavis.edu

VITICULTURE AND ENOLOGY
Future winemakers learn the science of grape growing and winemaking, benefiting from our outstanding faculty, facilities, and location next to the heart of California’s thriving wine industry.

CAREERS: Technical positions in the grape and wine industries in California or anywhere in the world, grape/wine producers, vineyard managers, grower relations managers, winemakers, enologists, winery lab technicians, viticulture or enology researchers, pest control advisers, grape or wine brokers, agricultural loan officers
1204A Robert Mondavi Institute – South Building
(530) 754-8368
http://wineserver.ucdavis.edu

SUSTAINABLE AGRICULTURE AND FOOD SYSTEMS
Explore the social, environmental and economic aspects of agriculture and food systems through an interdisciplinary, systems-based approach while developing the knowledge, skills and experience needed to be a leader in these fields.

Careers: Agricultural production, food systems management, rural and urban community services, education, agricultural development, agricultural and environmental sciences, and agricultural, environmental, and economic policy and analysis
1303 Hart Hall
(530) 752-2244
http://asi.ucdavis.edu/sf/samajor

WILDLIFE, FISH AND CONSERVATION BIOLOGY
Study how wild animal populations are impacted by human activities and gain the hands-on skills for a career in wildlife and conservation biology.

CAREERS: Biologists and managers with state, federal, and local agencies, environmental consultants, biologists with conservation organizations, environmental educators, wildlife tour guides, preparation for graduate or professional (e.g., veterinary) school leading to jobs as research scientists, conservation leaders, and teachers in primary, secondary, higher education institutions
1089 Academic Surge
(530) 752-6586

**Advising note:**

We hope this information assists students to continue their exploration into the majors within our college. This chart shows how lower division preparatory courses overlap into many of our majors. Students can also use this chart to assess which majors they may be more successful in based on their interest in certain subjects. All students should consult the General Catalog &/or seek academic advising about the specific major and degree requirements. Transfer students should utilize www.assist.org to find available lower division course work for the majors offered at their community college. Successful completion of these lower division courses will help a student begin their upper division course work upon transfer and significantly reduces time to degree.

This chart does not include all preparatory subject matter. Consult the General Catalog for details regarding University, College and major requirements.

**Notes**
Established more than 100 years ago, the College of Agricultural and Environmental Sciences was the first college at UC Davis.

**Undergraduates:** 5,253

**Campus undergraduates:** 23,499

**Located near** Sacramento, San Francisco and Lake Tahoe

**Campus size:** 5,300+ acres

**Class size:** Largest percentage of classes with fewer than 30 students (67%)

**Classes taught by ladder-rank faculty:** Highest percentage on campus (65%)

**Number of faculty:** 340

**Undergraduate scholarships:** More than $1.5 million/year. The only college to offer four-year, merit-based Jastro Scholarships

**Our freshman class includes** high-school class presidents, National Honor Society members and FFA leaders. Some of our recent students are outstanding athletes like three-time NCAA Woman of the Year, Kelly Albin, and entrepreneurs like Beth Kao, co-founder of oMEGA, a business to market milk, cheese and ice cream that are rich in omega-3 fats and low in saturated fats.
